

Alternative Sliding-Ball Banking System

billiards.colostate.edu

Alternative to the 1/3-more-than-twice banking system (shown with white lines below), with everything measured “**through the diamonds**” instead. This system is for banks at **fast speed** or with the **OB close to rail**.

The system requires **adjustment** for all lines except the 4-to-1.5 line:

- for lines below 4-to-1.5, **aim shorter**
- for lines above 4-to-1.5, **aim longer**

For more information, see the [fast-speed bank shot aiming systems resource page](#) in the FAQ section at billiards.colostate.edu
