

# “1-More-Than-Twice” Sliding-Ball Banking System

[billiards.colostate.edu](http://billiards.colostate.edu)

Simple approximate system using “through diamond” aiming  
(for sliding-OB banks at fast speed or with the OB close to rail)

The system (shown with gray lines) requires **adjustment** for all lines except the 4-to-1.5 line (the “sweet spot”):

- for lines below 4-to-1.5, **aim shorter**
- for lines above 4-to-1.5, **aim longer**

For more information and alternative systems, see the [sliding bank shot aiming systems resource page](#) in the FAQ section at [billiards.colostate.edu](http://billiards.colostate.edu)
