## TP A. 3

## Minimum cue stick elevation required for a head-spot-to-foot-spot center-ball-hit shot

supporting:
"The Illustrated Principles of Pool and Billiards"
http://billiards.colostate.edu
by David G. Alciatore, PhD, PE ("Dr. Dave")

$$
\text { ball diameter: } \quad \mathrm{D}:=2.25 \text {.in }
$$

table size: $\quad \mathrm{T}:=8 \cdot \mathrm{ft}$
rail height above playing surface: $\quad \mathrm{H}:=\left(1+\frac{11}{32}\right)$.in
cue stick thickness at rail: $\quad \underset{\sim}{\mathrm{C}}:=0.722 \cdot$ in

NOT DRAWN TO SCALE

initial guesses for unknowns:

$$
\mathrm{d}:=\frac{\mathrm{T}}{4} \quad \mathrm{~L}:=\mathrm{d} \quad \theta:=3 \cdot \mathrm{deg}
$$

Solving two loop closure equations (in the horizontal and vertical directions) for the unknown elevation angle:

$$
\begin{aligned}
& \text { Given } \\
& \qquad \begin{array}{l}
\mathrm{d}=\mathrm{L} \cdot \cos (\theta)+\frac{\mathrm{C}}{2} \cdot \sin (\theta) \\
\frac{\mathrm{D}}{2}+\mathrm{L} \cdot \sin (\theta)=\mathrm{H}+\frac{\mathrm{C}}{2} \cdot \cos (\theta) \\
\left(\begin{array}{c}
\theta \\
\text { mw } \\
\text { Lu }
\end{array}\right):=\operatorname{Find}(\theta, \mathrm{L}) \\
\theta=1.384 \mathrm{deg} \quad \mathrm{~L}=23.998 \mathrm{in}
\end{array}
\end{aligned}
$$
